

The 11th annual USTARS will be held at the University of Washington on March 18th & 19th, 2023.

Our Faculty speaker will be
Dr. Noelle Sawyer
from Southwestern University.

Check out www.ustars.org for more information and to apply to attend and present.

The primary mission of the Underrepresented Students in Topology and Algebra Research Symposium (USTARS) is to showcase the excellent research by students studying topology and algebra who are traditionally underrepresented in the mathematical sciences. Dedicated to furthering the success of those students traditionally underrepresented, USTARS seeks to broaden participation in the mathematical community by cultivating research and mentoring networks. USTARS is open to all and welcomes all those interested in topological and algebraic fields.

(Our definition of underrepresented includes the definition provided the National Science Foundation: minorities (African American, Hispanic, and Native American), women, and individuals with physical disabilities.)
